GOVERNMENT OF KERALA
DIRECTORATE OF MEDICAL EDUCATION

No: DME/1215/2023-B2

Dated : 25-02-2023

The Director,
Directorate of Health Services,
General Hospital Junction,
Thiruvananthapuram – 695035

Madam,

Sub:- DME-Academic-Posting of PG Students as part of District Residency Program (DRP) at **Kozhikode District-Reg.**

Ref:- 1. Gazette Notification on September 16, 2020 by NMC
2.U.O. No. 15706/2022/1/AC/Med/B1/KUHS of the KUHS, Thrissur
3. സ.ഉ.(സാധാ) നം.369/2023/H&FWD തീയതി 16-02-2023

As per reference cited 1st, the National Medical Commission has issued a Gazette Notification, mandating a 3-month District Residency Program (DRP) to be undertaken by broad-speciality students. The objectives of the program was also defined in the notification. Subsequently, as per reference 2nd, the Hon'ble Vice Chancellor of Kerala University of Health Science (KUHS) directed all the students of MD/MS in broad specialties in KUHS medical colleges to participate in the NMC mandated DRP beginning with the academic year 2021-2022.

As per reference 3rd cited, Government has issued orders for the posting of State Nodal Officer, Program Coordinator, DME Coordinator etc for the smooth implementation of the program. Accordingly, DME Coordinator has submitted the detailed list of students who can be posted in the hospitals under DHS at the **Kozhikode district**. I am hereby furnishing the said list as detailed below for issuing posting orders to the PG students to the hospitals/centres under DHS noted against their names for the period from 01.03.2023 to 31.05.2023 with direction to report to the District residency Program coordinator .

PROBLEM-SOLVING METHODOLOGIES

DEPARTMENT OF GENERAL SURGERY

LONG CASE SCENARIO- 5

A 40-year-old lady named Shylaja presents to the surgical OPD with a history of swelling in front of the neck for the past 10 years and palpitation for the last 6 months. There is no history of pain.

She has a voracious appetite, over eats but has lost weights.

She has excessive sweating and prefers cold weather.

She also complains of decreased sleep and she is apparently irritable.

She complains of amenorrhea for the last 3 months

On examination:

She has a pulse rate of 140 beats per minute and irregular in rhythm.

The eyes are normal.

A swelling of size 7 x 6 cm is palpable in the anterior aspect of the neck. Horizontally the swelling extends between anterior border of both sternocleidomastoids and vertically extends thyroid cartilage above and suprasternal notch below.

There are multiple nodules over the swelling and firm in consistency.

The lower border of the swelling is visible and palpable.

The swelling moves on deglutition. But not moving with protrusion of tongue.

The plane of the swelling is deep to deep cervical fascia.

Cervical lymph nodes are not palpable.

Systolic bruit is heard over the upper pole.

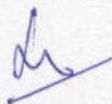

Write the case sheet with provisional diagnosis

SDL Number: Date: Time:

Topic: Describe, illustrate and label the angle of anterior chamber

Angle of anterior chamber plays an important role in the process of aqueous drainage. It is formed by:

- > ROI = Root of iris
- > CBB = Ciliary Body Band = anterior-most part of ciliary body.
- > SS = Scleral spur.
- > TM = Trabecular Meshwork
- > SL = Schwalbe's line = Prominent end of Descemet's membrane of cornea.

PATIENT-CENTERED AND EVIDENCE-BASED LEARNING

COMPETENCY-LEARNER DOCTOR METHOD

Name of patient: Abin Joseph

Age: Sex:

Short history:

Complaint of disturbed sleep, morning mouth breathing and occasional change in voice of 8 years of duration, mother also noticed decreased feeding for about 6 months.

Clinical findings:

General examination - dull expression with mouth breathing on entry & nasopharynx - thickened of upper lip, crowded upper incisors, high arched palate. Tonsils - normal size. Posterior pharynx well. Thick mucus plug drooping.

Note - cold spade test - decreased b/lc feeding

Diagnosis: ~~low~~ chronic adenoiditis with b/lc serous otitis media.

Investigations: CBC - leucocytosis; X-ray nasopharynx - moderate sized adenoid; hypopharynx - punctate adenoiditis

Course in

Morphol: 7/1m Abin was admitted with complaint of mouth breathing, morning for postprandial after meals. He was diagnosed with chronic adenoiditis with b/lc serous otitis media. The indication for adenoidectomy was b/lc mucus plug under etc. Postoperatively he

hospital: Reflection was better with antibiotics. Post-operative period was uneventful, there he was discharged a week. He was advised to have plenty of water fluids to build diet gradually from soft to solid food and hygiene is to be maintained.

Reflection:

This case gave us a very good idea as to how to approach a case of chronic adenoiditis with b/lc serous otitis media. We were able to

COMPETENCY-LEARNERDOCTOR METHOD

Name of patient:

Reine

Age: 26 Sex: Female

Shorthistory:

percent age needed need abolition of byers
history of summer episodes of sickness most discharge associated with
bank of money especially during early morning hours for the last 10 yrs

Clinical findings:

slight - cold spicule test - fogging decreased on both sides (more on right side)

-light new beauty worn with nail polish almost pinky.

inferior turbinate which is hyperboreoid with blunt irregular surface.

self neural cavity: wide neural cavity with inferior bushy hyperbaphus

and black mycelia rather

Diagnosis: ~~hyp~~ Demodicidosis / E infestans Turb. / Allergic Rhinitis

Investigations:

General: ABC - zoogeography; species: ONE - Penetration of Neel organism from west to east, hypothesis of life: before & middle tribulation, near north near south & south near north.

Course in tropical: 98/F-8me was admitted with complaint of nasal discharge for past 6 years

After release, almost overnight, she was diagnosed with one breast cyst with left inferior invagination. She underwent left mastectomy with sent nodes. Cyst, postoperatively she was

hospital: Reflection

spiral collection blade with aspirator and over all non blow down for spirit removal. pull operable advance - eared. forceful non blow down

S: review the book for spirit removal. post operative advice - every 4 hours. review esp. but to be followed initially - seriously pain to prevent cough & avoid harm to non-sterilized teeth.

own therapy. I have been very happy in the hospital. It was a very good opportunity.

COMPETENCY-LEARNER DOCTOR METHOD

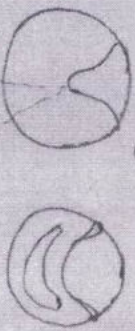

Age: 31 Sex: Male

Name of patient: Mathew

Short history: Recurrent episodes of left sided muffled ear discharge & left sided head & body ache childhood. tympanum struck with an episode of flu & ear ache followed by ear discharge in childhood. After that he had recurrent episodes of ear discharge following deep bath and upper respiratory infection last episode 1 ear discharge was 4 months back

Clinical findings:

Left ear: TM - Mucous and ceroid patches
Right ear: TM - Normal
Tuning fork test: Rinne - left - negative; Weber lateralized to left
ABC - normal b/e

Diagnosis: Left ear - Mucoid type, muffled with moderate CHC without complacence.

Investigations: OAE: Leucocytes; Microscopic examination of ear - TM perforated, cholesteatoma. Culture sensitivity of ear discharge - positive for pseudomonas, aerobically & 40000 CHC

Course in Hospital: 35/11 Mathew was admitted with complaint of recurrent episodes of left sided muffled ear discharge & left sided head & body ache. After clinical examination & investigation he was with left ear - mucoid type muffled with moderate CHC with complacence. Surgery was planned & he underwent type 1 hospital: Reflection tympanoplasty under GA. post operatively he was bedded with antibiotics. post operatively period was successful here he was discharged with oral antibiotics & other supportive measures.

S: It was asked to review after 6 weeks for suture removal.

Reflection
This case gave us a very good idea as to how to approach a muffled ear & body ache. Strongly recommend to all students. 31
