2.3.5 The teaching learning process of the institution nurtures creativity, analytical skills and innovation among students

The teaching and learning processes at KMCT Medical College are organized and carried out effectively in order to develop students' analytical skills and nurtures creativity .The teaching process also fosters students' innovations.

Case Based Learning

Case based learning sessions are introduced and are conducted regularly in addition to lectures. Topics which can be discussed through case scenario are identified and included for Case Based Learning. CBL helps in applying theoretical concepts to practical experience and enhances student's problem solving skills.

Project based learning

Each department is assigned with students as a part of elective module. The students themselves choose their respective department and then they choose a topic according to their interest. They develop booklets/ pamphlets'/ educational videos etc using their own creativity and innovative ideas and submit the report to respective departments.

Family surveys and community diagnosis

Our teaching and learning process insist all the students to carry out family surveys and community diagnosis which helps in developing their analytical skills. The students assess the socio demographic profile of the community, morbidity and mortality details, environmental determinants of health sanitation, vector breeding sites etc, social and community needs.

Health care of adopted families

During the course of the entire MBBS programme the assigned student should be the bridge between the family and the health needs of the family. The students should ensure that they communicate with the family at-least 10 times in each year.

As part of innovative learning activity all students from first year adopt a family from rural area and monitors and documents following:

1) Socio demographic details of family members.
2) Morbidity profile.
3) Record of vital events like birth, death etc.
4) Health seeking behavior.

Simulation based learning

Learning sessions by simulation are conducted for both under-graduates and post-graduates by using high fidelity mannequins for recreating real time clinical scenarios. Teaching session is followed by debriefing session involving guided reflective learning. Simulation based learning creates shift from traditional teacher centered learning to student centered learning. Simulated learning is useful for reflecting upon experience in clinical areas because it develops clinical reasoning and integrates theory with practice. Mistakes may be made and learning can occur without risk to patients.

FAMILY SURVEYS AND COMMUNITY DIAGNOSIS

COMMUNITY BASED TEACHING ACTIVITIES

PALLIATIVE CARE

The visit to Palliative Care in Kozhikode is done with the objective to make the students to understand the problems of terminally ill patients and also it is a range of services delivered by a range of professionals that all have equally important roles to play – including physicians, nursing, support workers, paramedics, pharmacists, physiotherapists and volunteers — in support of the patient and their family. With the visit the students understand that the patients in palliative care receive medical care for their symptoms, or palliative care, along with treatment intended to cure their serious illness. Students are introduced to the care to be given, like position change to prevent the bed sores, ryles tube insertion etc. Also they are briefed about the funding and administration of the center.

FAMILY ADOPTION PROGRAMME

Family adoption programme (FAP) provides an experiential learning opportunity to medical students towards community-based health care. It gives them a first-hand experience of the living conditions of the people they encounter as patients in the hospital. The students also understand how various determinants of health influence patients in real life. The National Medical Commission (NMC) has mandated FAP for MBBS students from 2022. During the FAP the student establishes rapport with the family allotted to them, understand their health and related factors, and help improve the healthcare of the family, and by extension, the community. Thus it is expected to help in achieving Universal Health Coverage. This also helps the students to understand how community leaders, social organizations and village health committees work together for health.This community–academic partnership offers a unique opportunity to learn the social and cultural determinants of health.

KMCT MEDICAL COLLEGE Pin - 673602

Principal
KMCT Medical College
Manassery P.O.
Kozhikode

MEDICAL CAMP

The students are involved in conducting various medical camps in and around Kozhikode district. They understand the medical camp help the underprivileged people to get the services at free of cost. Also it helps in screening of various diseases. The students get the opportunity to understand about screening and its benefits and also follow up for the patients. Conducting camp provide them to have patient interaction and detection of the diseases.

OLDAGE HOME

Old age home caters the elderly who are in the later stages of their life and have no one to look after them. Old age home visit helps students to understand the geriatric problems including physical, social, psychological problems and how to address them. Students interact with the inmates of the old age home thereby which they get to know the profile of the inmates so that they understand problems faced by each of the inmates. The students get the opportunity to speak with the administrator and understand the functioning of the old age home. The students also learn about the various pension schemes available for the old age people.

BLIND HOME

Blind home is an institution that works for the visually impaired people. The students are taken to the Home for destitute blind under the Kerala federation of the blind. During the visit the students understand the functioning of the blind home. They get to know the teaching methods opted there including Braille coding. They also understand the problems faced by them in the society. Also various opportunities available for them are explained by the manager of the blind home.

IMMUNISATION at PHC

Students are sensitized with the Universal Immunization Programme (UIP). For understanding about immunization and cold chain students are taken to primary health centers (PHC). During the visit they observe how the vaccines are stored in a PHC, how each vaccine under UIP is administered to the beneficiary. The health worker- JPHN explains about the vaccine storage, ILR, temperature maintenance and various vaccines. They also get the opportunity to observe vaccination techniques and steps to be taken if any adverse reactions occur. By the visit to immunization at PHC they also understands that it is the most cost-effective public health intervention, largely responsible for reduction of vaccine preventable diseases and contributing to decrease in under 5 mortality of children.

FAMILY VISIT/ SURVEY

Family visit/survey helps the students in understanding the clinic socio-cultural and the demographic profile of the families they visit. They understand their environmental issues, cultural practices, role of family in health and disease, barriers to good health and health seeking behavior etc. The analysis that done after the visit helps them in understanding the health challenges of each family and arrives at a community diagnosis, and they formulate steps to resolve the problems in the family they visited.

ANGANWADI VISIT

Anganwadi visit helps the students to learn about the Integrated Child Development Services. During the visit the anganwadi teacher explains them about her duties, beneficiaries under the program, and the services. The students also get the opportunity to observe the growth charts and other records maintained at the anganwadi.

SUBCENTRE VISIT

Subcentre visit helps the students to understand about the health centre which is the most peripheral and first contact point between the primary health care system and the community, and it is largely preventive and promotive, and also provides a basic level of curative care. Also it helps them to familiarize the services provided by a subcentre and its main functions. The students get the opportunity to interact with the junior public health nurse (JPHN) and the ASHA (accredited social health activist) who details about the wide spectrum of services provided through the subcentres.

PHC VISIT

Primary health centre (PHC) is the cornerstone of health services and the first port of call to a qualified doctor of the public sector for the sick and those who directly report or referred from subcentres for curative, preventive and promotive health care. PHCs provide health care that is quality oriented and sensitive to the needs of the community. During the PHC visit students learn about services provided by a PHC and also about it's working and staffing pattern. Also they get the opportunity to observe the immunization session, cold chain and ILR working, and the essential drugs in the PHC etc. By this visit the students understand that a PHC is a basic health unit to provide health services close to the people, and it is integrated with curative and preventive health care, and emphasis is given to preventive and promotive aspects of health care.

WATER TREATMENT PLANT VISIT

The students are taken to water treatment plant of Koolimadu under Kerala water authority. Water treatment plant visit helps the students to learn and observe the steps in large scale water purification. They also get to know about the laboratory tests used for checking the water quality before, during and after the process of purification. They also learn about the water disinfection procedure with chlorine gas in the water treatment plant.

DAIRY PLANT VISIT

The students are taken to the MILMA dairy plant at Peringolam, Kunnamangalam. The dairy plant visit provides students with the practical exposure where they could experience the operations of the milk industry- product manufacturing, processing and handling. Students learn about milk processing, pasteurization and various laboratory tests used for the quality control. They observe the equipments functioning, how the milk is received, stored and processed into dairy products.

STREET PLAYS & ROLE PLAYS

Students are taken to the designated areas of the community to familiarize them about the importance of giving social awareness and health education to the community and also about its role in prevention of diseases. This is observed in connection with special health days like TB day, AIDS day etc.

FACTORY VISIT

Students are taken to the industrial establishment to know about the procedures and processes at an industrial unit, its relationship to health and disease. They also understand how the people work there, importance of using personal protective equipments while working to prevent industrial accidents as well as diseases.
